**Join us in our journey to revolutionize urban cleanliness
and make a lasting difference in the way
sweeping and litter picking is
done in India.**

Introduction

About Us: We are a dynamic startup specializing in Electric Vehicles, with a focus on revolutionizing the way sweeping and litter picking is done in India. Our flagship product, the Elexiant Litter Picker, is designed to meet the unique needs of Indian cities, ensuring efficient and effective cleaning solutions. Additionally, we are proud to be the Authorized Sales and Service Representative for the Tenax range of Electric Sweepers and Street Washers.

Our Vision

To lead the transformation of urban cleanliness in India through innovative, sustainable, and high-quality electric vehicle solutions, making our cities cleaner, greener, and more livable for everyone.

Our Mission

Our mission is to provide innovative, sustainable, and high-quality cleaning solutions that are “Make in India” and “Made for India.” We aim to transform urban cleanliness with our cutting-edge electric vehicles, making a significant impact on the environment and the quality of life in our communities.

Our Team

We are a young, talented, and highly skilled team, driven by a passion for innovation and excellence. Our team is dedicated to providing exceptional solutions and services, ensuring customer satisfaction and contributing to a cleaner, greener India.

Why Choose Us

Make in India, Made for India: Our products are designed and manufactured to meet the unique challenges of Indian cities. **Innovative Solutions:** We leverage the latest technology to provide efficient and sustainable cleaning solutions. **Expertise and Support:** Our team of experts is committed to delivering top-notch service and support to our customers. **Environmental Impact:** Our electric vehicles contribute to reducing pollution and promoting a cleaner environment.

ELEXIANT Litter Picker

Elexiant Litter Picker Vacuum Operated with Lithium Ion Battery

Effortless Litter Collection with Innovative Solution

- Battery Operated
- Ride On
- Speed 7 kms/hour
- Suction Hose 3 Meters long
- Polyester & Galvanized
- Runs 08 Hours plus in a single charge
- External Charger
- Water Tank Capacity of 12 Liters
- Turbine & Traction PMSM Motors

Revolutionize Cleanups with Our Battery-Operated Litter Picker!

maxwind

MaxWind is the first 100% electrically powered and operated 24 Volt electric pavement sweeper in the world with zero CO₂ emissions.

Balanced and ergonomic, it is the perfect solution for sweeping pavements, pedestrianised areas, car parks and any small or medium-sized areas, both indoors and outdoors. Safe, easy to handle and efficient, MaxWind offers runtime of up to ten hours and improves the lives of both operatives and residents.

ELECTRA 5.0 Life

Electra 5.0 Life is the first fully electric compact street sweeper with a 5 m³ load capacity and zero CO₂ emissions.

Tenax Electra 5.0 guarantees outstanding quality and reliability, thanks to exclusive 100% electric technology, the result of over 15 years of experience in the world of fully electric sweepers. In addition, Tenax Electra 5.0 guarantees excellent sweeping quality, an extremely powerful suction system and a high load capacity. These key characteristics, together with its comfort and exceptional stability and maneuverability, allow it to redefine market standards.

Electra 2.0 evos+

Electra 2.0 evos + is the innovative electrically powered and operated 48-Volt compact road sweeper with zero CO₂ emissions.

Harmonious and ergonomic, thanks to its improved performance, noiselessness and reduced dimensions, it guarantees an autonomy of up to 10 hours and is the ideal solution for cleaning city centres, pedestrian areas, cycle paths and, in general, small and medium-sized indoor and outdoor areas. Safe and intelligent, Electra 2.0 evos + improves the quality of life for citizens and operators and guarantees excellent performance.

ELEXIQ
EleXiq Technologies Private Limited

Electra 1.0

Electra 1.0 is the 100% electric 48 Volt compact road sweeper, with 360 l removable DIN waste hopper and zero CO₂ emissions.

Balanced and ergonomic, with extraordinary performance, quiet operation and extremely compact size, it guarantees runtime of up to nine hours and is the perfect solution for cleaning town centres, pedestrianised areas, cycle lanes, and more generally any small or medium-sized areas, both indoors and outdoors. Safe and intelligent, Electra 1.0 improves the lives of both operatives and residents.

Smartwind+

Smart wind is the 100% electric road sweeper which is completely unique, as it is the most compact ride-on road sweeper with raised offloading.

Featuring an innovative "steer-by-wire" system controlled by a control stick which makes it safe and manageable, it is the ideal solution for cleaning both indoor and outdoor areas of small-medium size. Ecological and versatile, this ride-on road sweeper improves the quality of life both of its operator and residents by completely eliminating CO₂ emissions and providing a 40% reduction in noise levels.

maxwind hydro

MaxWind hydro is the first zero CO₂ emission sidewalk washer in the world which is 100% run and operated by electricity.

Harmonious and ergonomic, it is the ideal solution for cleaning and washing sidewalks, pedestrian zones, parking lots and any small or medium sized area, both indoors and outdoors. Safe, manoeuvrable and efficient, MaxWind hydro guarantees up to 10 hours of autonomy and improves the quality of life of residents and operators a like.

Mosquito Trap

Mosquito Trap

Advanced Lure Technology

Uses a combination of CO₂, UV light, and pheromones to attract mosquitoes effectively.

Eco-Friendly & Chemical-Free

Safe for children and pets, it operates without harmful chemicals.

Durable for Outdoor Use

Weather-resistant galvanized iron construction ensures year-round durability.

Wide Area Protection

Designed to cover large outdoor spaces like parks, resorts, and gardens.

Easy to Move & Maintain

Comes with wheels for mobility and includes a CO₂ cylinder and pheromone kit for ongoing use.
